Legerd to Leyout of Oxygen Plant at Kezin Fercika.

- 1 through 10 Prick settlement houses, four-story structures each measuring 12 x 20 meters
- 11 Administration building, 150 x 25 meters
- 12 Laborstory, 25 x 12 meters
- 13 Storage depot, 50 x 18 x 8 meters
- 14 Synthetic plant, 97 x 97 x 24 meters; three large and 25 small concrete bases for machinery were constructed in this building. The machinery had not arrived by June 1953.
- 15 Tower under construction. The tower is 16 meters square and is scheduled to be 24 meters high.
- 16 Tower under construction. The tower measured 20 x 10 meters and was scheduled to be 35 meters high.
- 17 Circular concrete tower, 26 meters high, fitted with openings designed to receive tubes. The tower was completed in June 1953, but no machinery had been installed by that date.
- 18 Tower same as item 17.
- 19 Container about 11 meters in diameter and 15 meters high.
- 20 Oxygen plant. Brick structure 80 x 60 x 20 meters. The framework of the building was completed in March 1953. The machinery to be installed at the plant came from East Germany.
- 21 Metal container, 15 meters in diameter and 10 meters high.
- 22 and 23 Water-cooling towers completed in June 1953; 10 meters in diameter and 43 meters high.
- 24 Water reservoir, a concrete tasin 100 x 20 meters, 8 meters deep.
- 25 Pumping station, brick structure, 27 x 10 x 15 meters.
- 26 Transformer station, a four-story brick structure, 20 x 15 x 18 meters.
- 27 Circular brick tower, 15 meters in diameter and scheduled to be 44 meters high.
- 28 "Hoko" plant, a four-story building, 80 x 40 x 28 meters. The machinery for the plant arrived in April 1953. A number of silver-grey metal containers were observed in the factory area. The nature of factory was unknown to source.
- 29 So-called "Salt-storage Depot", 100 x 40 x 20 meters.
